in North America, which would reduce California’s carbon footprint and boost the state’s renewable energy

It may be necessary to adjust the dosage and monitor plasma drug concentrations (or, in the case of coumarin, coagulation times), when initiating or discontinuing concomitant methylphenidate.

The office that handles generic drugs is understaffed and overwhelmed by the number of new applications, which have risen from a couple of hundred a year to more than 1,000.

These days people are like crazy about fairness.

NSF makes every effort to conduct a fair, competitive, transparent merit review process for the selection.
